

23 Skills. One System. Running Your Search Every Day.

Not 23 templates you fill in. 23 AI skills built into your own Claude Project, loaded with your background, your voice, your targets — ready the moment you need them.

REAL NUMBERS, NOT A PITCH

Resume services charge **\$2,500** for one ATS-optimized resume.

Skill 11 below does that — tailored to any job description, in your voice, in minutes — as one of 23 skills included. Not a one-time document. An engine that runs it again for every role, for as long as you need it.

What I actually see: most job seekers use ChatGPT once for a generic resume and stop there. These 23 skills are built to run together, all day, in your voice — the same system handling your outreach, your prep, your follow-up, and your positioning while you're still at your day job.

01 Land the Interview

- 01 **Outreach Templates** — Personalized LinkedIn DMs and cold emails to hiring managers and recruiters, written in your voice, ready to send.
- 02 **Reply Skill** — Paste any message you got back. Get the right reply in seconds — no more staring at the blinking cursor.
- 05 **Sales Navigator Playbook** — A step-by-step search-and-outreach plan for any target company or decision-maker.
- 08 **Follow-Up Sequence Logic** — Know exactly when to follow up and what to say, every time, so nothing goes cold from silence.
- 18 **Network Activation Script** — Reconnect with old contacts the right way — a message that doesn't read like you only show up when you need something.

02 Win the Application

- 04 **JD Analyzer** — Paste any job description, get your real fit score, the keywords you're missing, and the one line to lead with — in 60 seconds.
- 09 **"Should I Apply?" Framework** — A clear yes/no on any posting in 60 seconds, so you stop burning hours on roles that were never a fit.
- 11 **Resume Tailoring Engine** — Rewrites your resume against any JD, keyword-aligned and ATS-optimized, in minutes.
- 14 **Cover Letter Generator** — A tailored cover letter for any role, in under 2 minutes.
- 15 **ATS Keyword Scanner** — Shows you exactly why a resume gets filtered before a human ever reads it, and how to fix it.

03 Show Up Prepared

- 03 **Interview Prep Engine** — A full prep package built for one specific interview — not generic advice.
- 10 **Conversation Coaching** — 5-minute prep before any call, so you walk in ready instead of winging it.
- 17 **Story Builder** — Turns any resume bullet into a STAR-format story you can actually tell out loud.
- 19 **Hiring Manager Research Brief** — A 3-minute intel brief on exactly who you're meeting with.
- 20 **Pain Point Mapper** — Maps a company's real pain points to your specific experience, so you walk in already knowing the problem you're there to solve.
- 23 **Operations Narrative Builder** — Translates operational experience into a story hiring managers actually respond to.

04 Close the Offer

- 07 **Negotiation Scripts** — Scripts your next move at any stage of a negotiation, from first number to signed offer.
- 21 **Salary Research Tool** — Real comp benchmarks by role, level, and location, before you ever get asked "what are you looking for."

05 Stay Visible

- 06 **LinkedIn Content Engine** — Posts and comments written in your voice, so you show up in front of the right people without staring at a blank box.
- 12 **Target Company Job Scan** — Scores every one of your target companies for live openings — more accurate than any job board.
- 13 **Cowork Job Scan** — Runs automatically, every day, and drops a scored briefing in your inbox before you even open your laptop.
- 22 **Inside Sales Org Research** — Finds the companies with the exact team structure where your background is most competitive.

06 Plan the Win

- 16 **30-60-90 Day Plan Builder** — Turns any job description into a role-specific 30-60-90 plan — the same one final-round candidates get asked for, except you walk in with it already built.

★★★★★

"I came to Bill for help with my LinkedIn presence. What I got was a complete repositioning strategy — and results I didn't expect. After completing my 90-Day Impact Portfolio, my profile views went up, recruiter calls went up, and I had a roadmap I actually knew how to execute."

Janelle Gunther — Manufacturing & Automation Leader, PhD Materials Science (MIT)

This is what runs while you're at your day job.

Every skill is pre-loaded with your background, your voice, and your targets before you ever open a chat. See the full system, how it's set up, and what's included.
